

Australian Veterinary Stem Cells Pty Ltd has an exclusive license over both granted patents and patent applications - covering the use of stem cells derived from adipose tissue - in Australia, New Zealand and Asia.

Included in the licensed patents and patent applications is the granted/issued Australian patent number:-

◆AU 784580 - Adipose-derived stem cells and lattices◆

The claims in this patent are ◆very broad◆ and basically cover the use of all mammalian stem cells derived from adipose tissue.

As an example Claim 1 covers:-

◆A mammalian lipo-derived stem cell substantially free of mature adipocytes◆

There are an additional 121 granted claims covered by this patent.

Additional licensed patent applications in Australia, New Zealand and Asia, provide Australian Veterinary Stem Cells Pty Ltd with a very strong intellectual property position in regard to the use of all stem cells that are derived from adipose tissue ◆ in veterinary applications.
