

Thank you very much for making stem cell therapy a viable option for our four year old Clumber spaniel Lawrance.

Kurt Schulz, DVM from Burlington Vermont Veterinary Specialist injected both of Lawrance's horribly arthritic elbows last June. Lawrance sustained corinoid fractures in both elbows (requiring surgery)when he was one year old and had arthroscopy on both elbows for bone fragment removal last June just prior to the stem cell injections.

Lawrance has made a remarkable recovery! He is walking without a limp, and seems very comfortable and happy. Lawrance is very special to us and we are truly grateful for your services.

Thanks again for making it possible for Lawrance to enjoy some quality of life.

- Lisa and Bill Druary & Lawrance
