

<p style="text-align: center;"></p> <p class="spotlight">Bart has always been a very intense retriever. He lives his life solely to retrieve. It broke our hearts to see the pain he was experiencing due to osteoarthritis in his elbow after only a short period of playing fetch. The pain became so severe we stopped his daily routine of playing. My wife and I couldn't stand seeing Bart suffer, so we decided to try Vet-Stem to see if it would alleviate his problems, and it did. Bart is now 6 months post surgery and he is totally like a puppy again. Just like when I first received him. - Jim Williams & Bart</p>
