

It has been over a year since my quarter horse gelding Smokey severed a tendon on his left hind leg. After being treated with Vet-Stem Regenerative Cell Therapy, he is once again sound and back on the Big Horn Mountains of Wyoming enjoying trail rides.

This past summer we went on trail rides lasting up to seven hours and at elevations up to 10,000 feet. I would not have had such a wonderful summer without your assistance. Thank you Vet-Stem!
