

AVSC currently provides stem cell therapies to treat the following conditions:-

A) Dogs:

- Osteoarthritis
- Polyarthritis
- DJD and cartilage damage
- Tendon/ligament injuries such as an adjunct to cruciate tear treatment

B) Horses:

- Ligament Injuries - eg Suspensory Ligament Injuries
- Tendon Injuries - Bowed Tendon etc
- Osteoarthritis
- Cartilage damage

AVSC is also working to develop therapies suitable for feline disorders as well as canine atopic dermatitis and canine congestive heart conditions.

AVSC believes that stem cell based therapies can significantly contribute to the improvement treatment of degenerative conditions and injuries in the veterinary setting.
